

## **Shops in Europa Centralna reopened for customers**

**From the nearest Monday, May 4, shops will be reopened in Europa Centralna. The sale will be carried by taking into account all precautions and maintaining the applicable sanitary rigor.**

Europa Centralna has already implemented the required procedures and is ready to implement the ordinance of the Prime Minister on the partial abolition of previously introduced restrictions. From May 4, customers will be able to shop at commercial premises available in Europa Centralna.

According to the current guidelines, only one person may stay on a 15 m<sup>2</sup> of the center's area. The center will therefore control the number of clients entering the facility. The same provision also applies to commercial premises. At the entrance to individual stores, detailed information will appear about how many people can be inside at the same time. However, Europa Centralna has such a large surface area that its capacity should remain at its current level. Such area and some stores located in a shopping park with a direct entrance from the car park will also facilitate the implementation of all required rigors of health protection, giving customers a great sense of security.

All applicable rules for using the center will be regularly communicated and enforced to visitors. Special movement zones will be marked out on Europa Centralna's passageways. Horizontal signs will regulate traffic so that the required distance between clients is maintained, and passing passes without collision. It is recommended to park cars in every second parking place. This will minimize the risk of direct contact with other people. Europa Centralna has a very large car park for 2,300 cars, which is an additional convenience for customers.

All surfaces and common elements, exposed to frequent touch of customers, will be regularly disinfected. Non-cash payments are also recommended when shopping. There will be an absolute mandatory of wearing mask at the center. They will also be available for purchase at Super-Pharm and the mask machine. However, the shopping center will provide hand disinfectants for free.

*„We are ready to reopen the stores. We took care of all security measures. However, we would like to ask everyone visiting Europa Centralna – mutual discipline is needed. The obligatory wearing of masks and gloves, as well as compliance with sanitary restrictions in force in the center will cause that we will ensure the safety of ourselves and all persons staying in Europa*

*Centralna. Let's take care of a healthy return*” – said Katarzyna Lenartowicz, Shopping Center Director, Europa Centralna.

From May 4, Europa Centralna will be open from 10 am till 7 pm. The timetable of the bus to the EC was also adjusted to the new opening hours of the center. Detailed information can be found on the website of the Metropolitan Transport Authority. Although the food court will not be opened yet, there will be a possibility of ordering take-out food. The playground and "House of Air" trampoline park will still not be available to customers. The opening of this type of activities is planned by national authorities in the next stage of defrosting the Polish economy.
